Statistics Homework 1

Kahr Kunne (S3435342)

2019.09.20

1. (a) Half of values are lower than the median. If the mean is also lower than the median, then less than half of values are lower than the mean, i.e. there are more "high" values than "low" values. We expect the distribution to be left-skewed.

   (b) i.
